Hands-On OpenCode

Dr. Ali Asghar Manjotho

ARTIFICIAL INTELLIGENCE LAB – 22BSCS

What if OpenCode?

- **OpenCode** is an open-source agent that helps you write and run code with any AI model. It's available as a terminal-based interface, desktop app, or IDE extension.
- With **OpenCode** you can use any LLM provider by configuring their API keys.

Download and Install curl

- Visit the following link to download:

https://curl.se/

Windows 64-bit			
Windows 64-bit	8.19.0	tool + devel	the curl project
Windows 64-bit	8.19.0	tool	Chocolatey
Windows 64-bit	8.19.0	tool	Muldersoft
Windows 64-bit	8.19.0	tool	Winget
Windows 64-bit	8.19.0	tool	Scoop
Windows 64-bit	8.19.0	tool	conda-forge
Windows 64-bit	8.19.0	libcurl	Vcpkg
Windows 64-bit	8.19.0	source	Conary
Windows 64-bit	8.6.0	tool	PHP
Windows 64-bit ARM64	8.19.0	tool + devel	the curl project

Download and Install curl

curl 8.19.0 for Windows

These are the latest and most up to date **official** curl binary builds for Microsoft Windows.

curl version: 8.19.0
Build: 8.19.0_4
Date: 2026-03-11
Changes: 8.19.0 changelog
Supported Windows versions: Vista, 7, 8, 10, 11

curl for x64

Size: 8.0 MB
pgp / minisign / cosign / SSH / sha256:
4953b191dc9c5468021d849bdc949559d65c568549460e085466e3b0a9e64c5f

curl for ARM64

Size: 7.8 MB
pgp / minisign / cosign / SSH / sha256:
54fc7d95ed2759fb7dd4f0b51d7fe1e7505e897901905e8cd49deb41858a1749

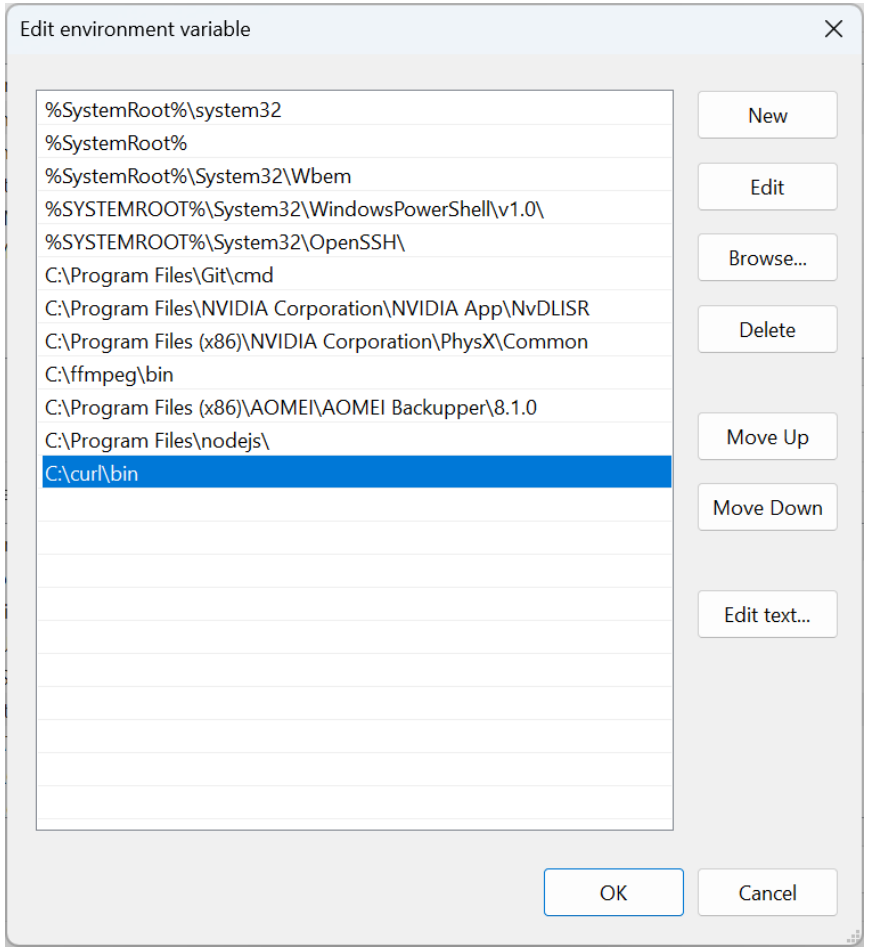
Set Path Environment Variable

- Extract the folder in `C:\`
- Rename the folder to `curl`

curl

- Add curl bin path in `PATH` environment variable:

  `C:\curl\bin`



Download and Install git

- Visit the following link to download:

  https://git-scm.com/

Install WSL

- Open command prompt and run:

```
wsl --install
```

Windows Subsystem for Linux (WSL)

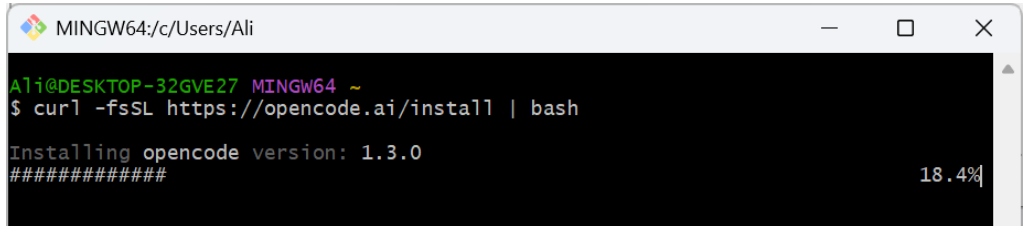
Install OpenCode

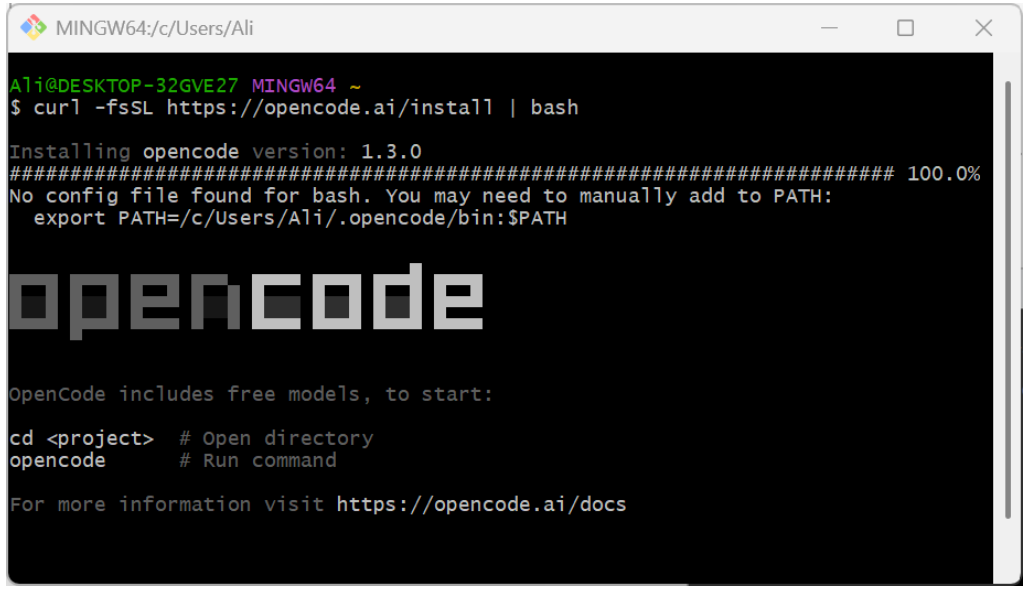
- Visit the following link for instructions:

  https://opencode.ai/

- Open git bash from start menu and run the following command:

```
curl -fsSL https://opencode.ai/install | bash
```



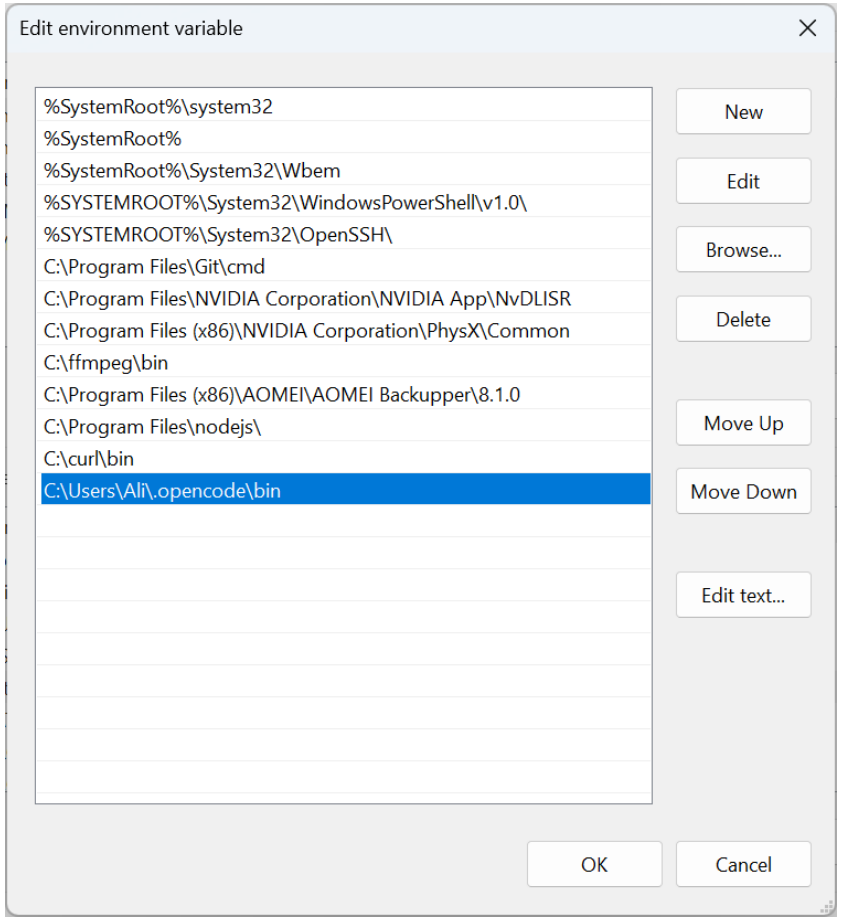


Set Path Environment Variable

- Add opencode path in PATH environment variable:

  `C:\Users\Ali\.opencode\bin`

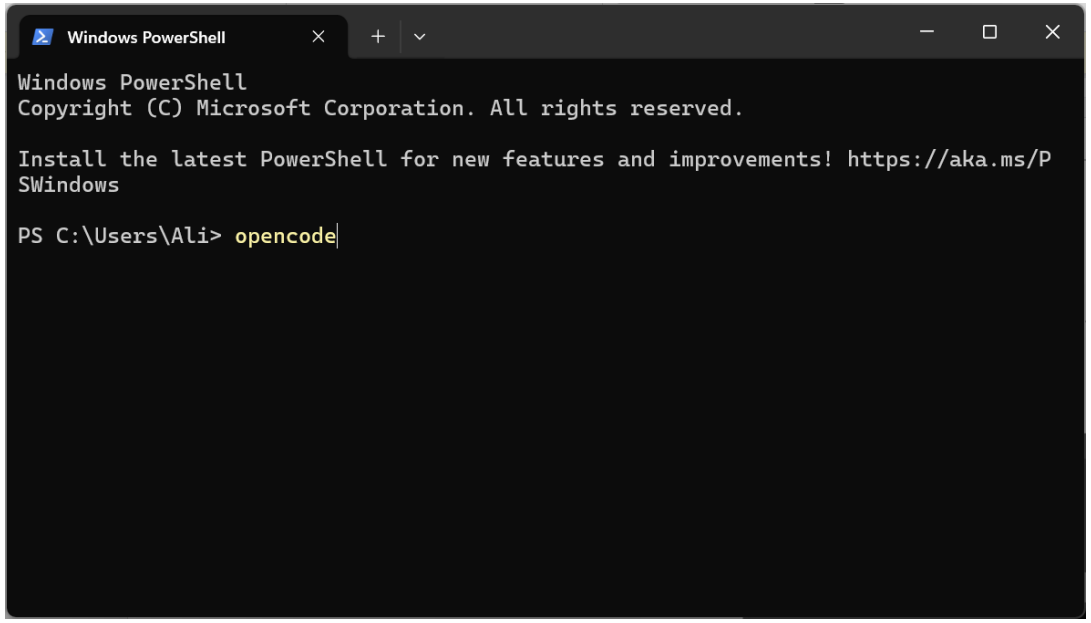
- Change `Ali` with your own system username



Run OpenCode

- Open Command Prompt and run command:

  opencode

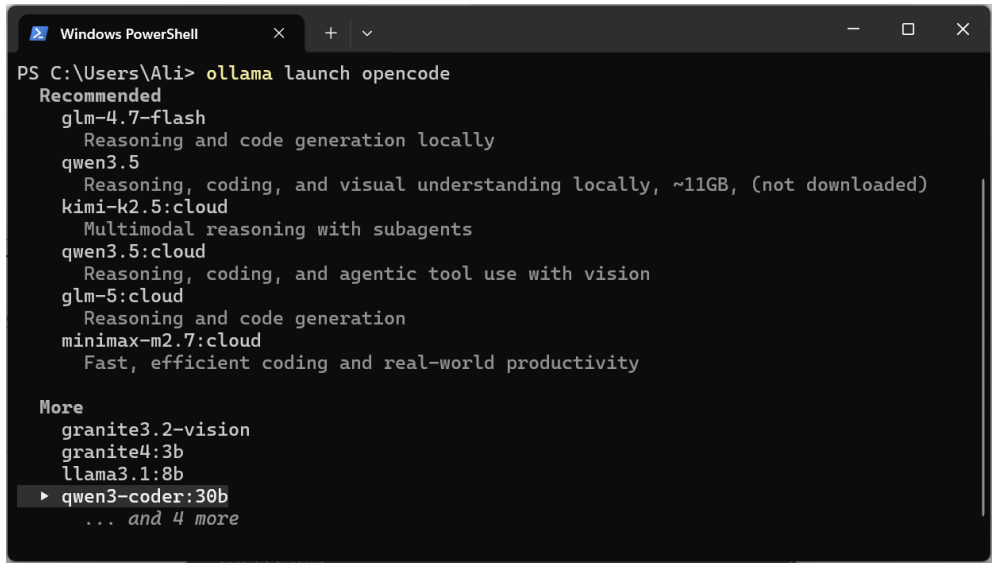


Ollama with OpenCode

- Open command prompt and run the following command:

  `ollama launch opencode`

- Select the model and press Enter

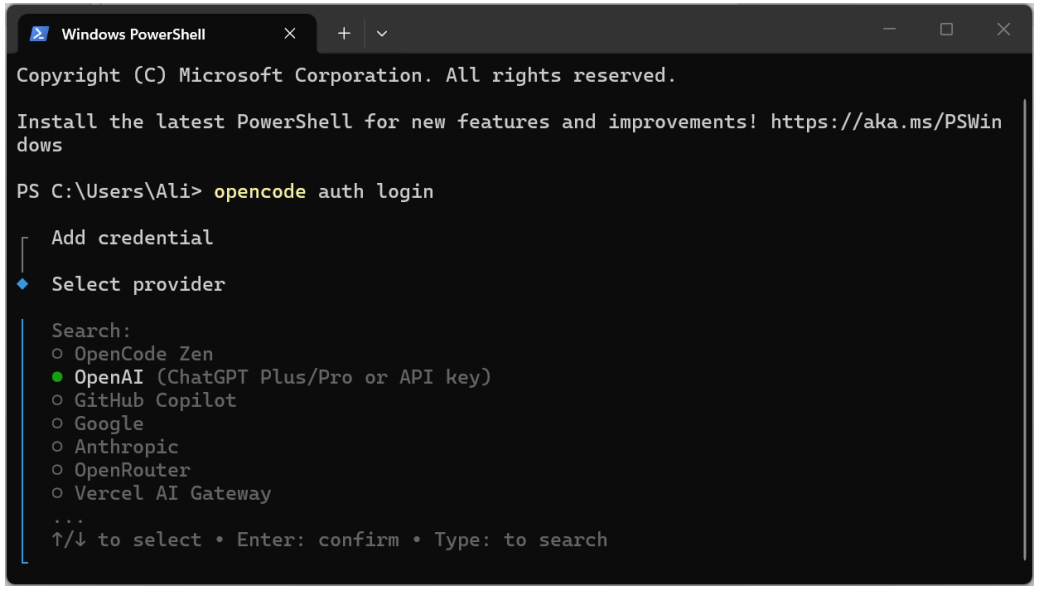


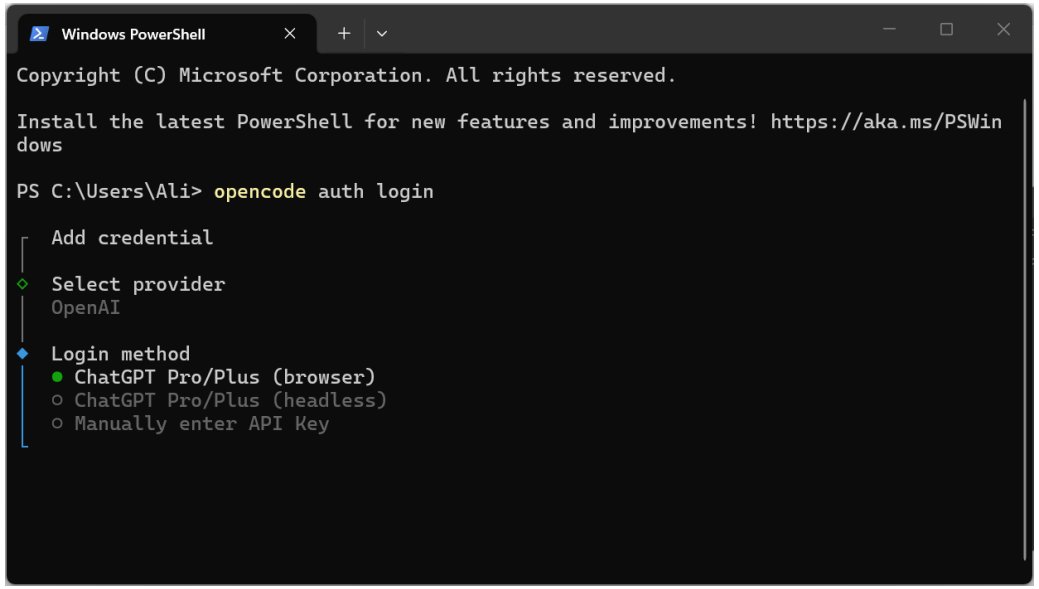
OpenCode Shortcuts

Shortcut	Action
Tab	Switch between Agents
CTRL+P	List of commands
CTRL+T	Change model thinking mode
CTRL+X then m	Switch model
CTRL+X then n	Create new session
CTRL+X then l	Switch session
CTRL+X then t	Switch theme
ESC	Cancel current task

Connect OpenAI with OpenCode

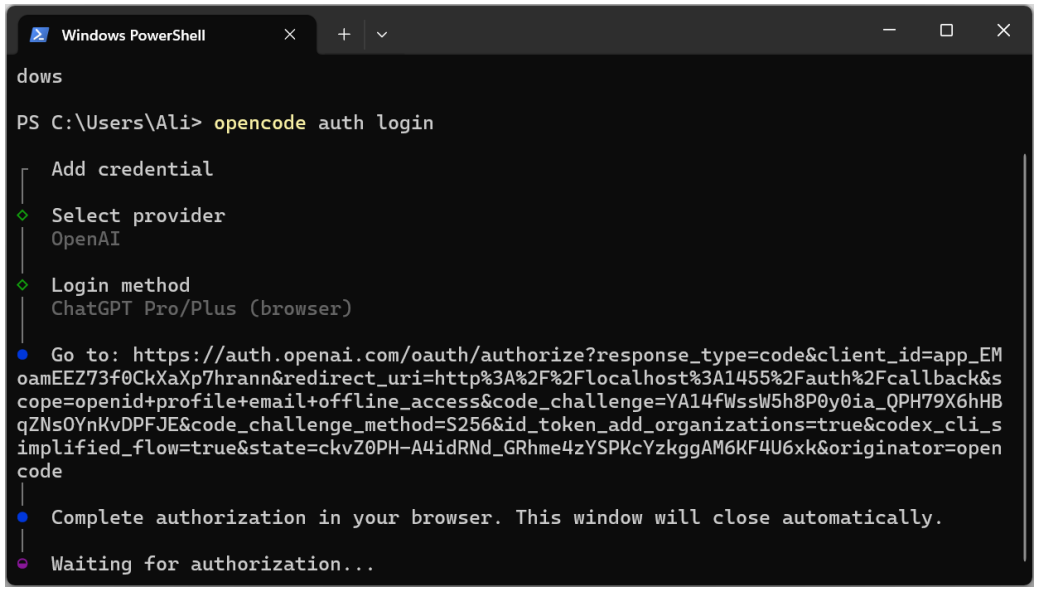
- Open Command Prompt and run command:
  `opencode auth login`
- Select:
  - Provider = OpenAI
  - Login Method = ChatGPT Pro/Plus (browser)
- Copy the link in browser and press enter

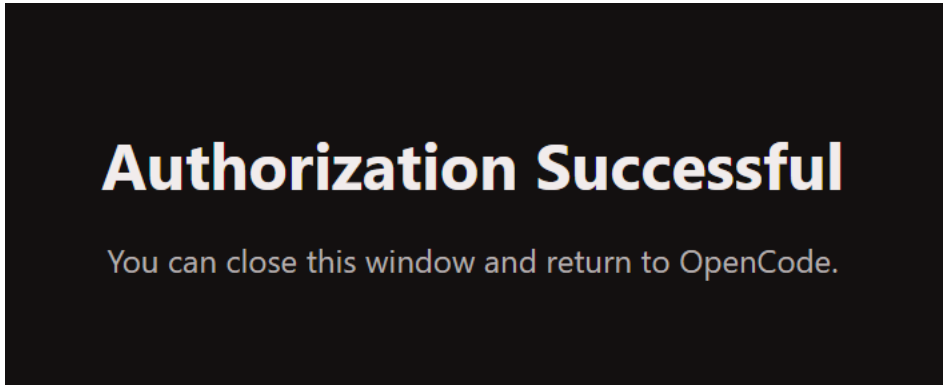




Connect OpenAI with OpenCode

- Login to your ChatGpt account





Connect OpenAI with OpenCode

```
Windows PowerShell

Add credential

Select provider
OpenAI

Login method
ChatGPT Pro/Plus (browser)

Go to: https://auth.openai.com/oauth/authorize?response_type=code&client_id=app_EM
oamEEZ73f0CkXaXp7hrann&redirect_uri=http%3A%2F%2Flocalhost%3A1455%2Fauth%2Fcallback&s
cope=openid+profile+email+offline_access&code_challenge=YA14fWssW5h8P0y0ia_QPH79X6hHB
qZNsOYnKvDPFJE&code_challenge_method=S256&id_token_add_organizations=true&codex_cli_s
implified_flow=true&state=ckvZ0PH-A4idRNd_GRhme4zYSPKcYzkggAM6KF4U6xk&originator=open
code

Complete authorization in your browser. This window will close automatically.

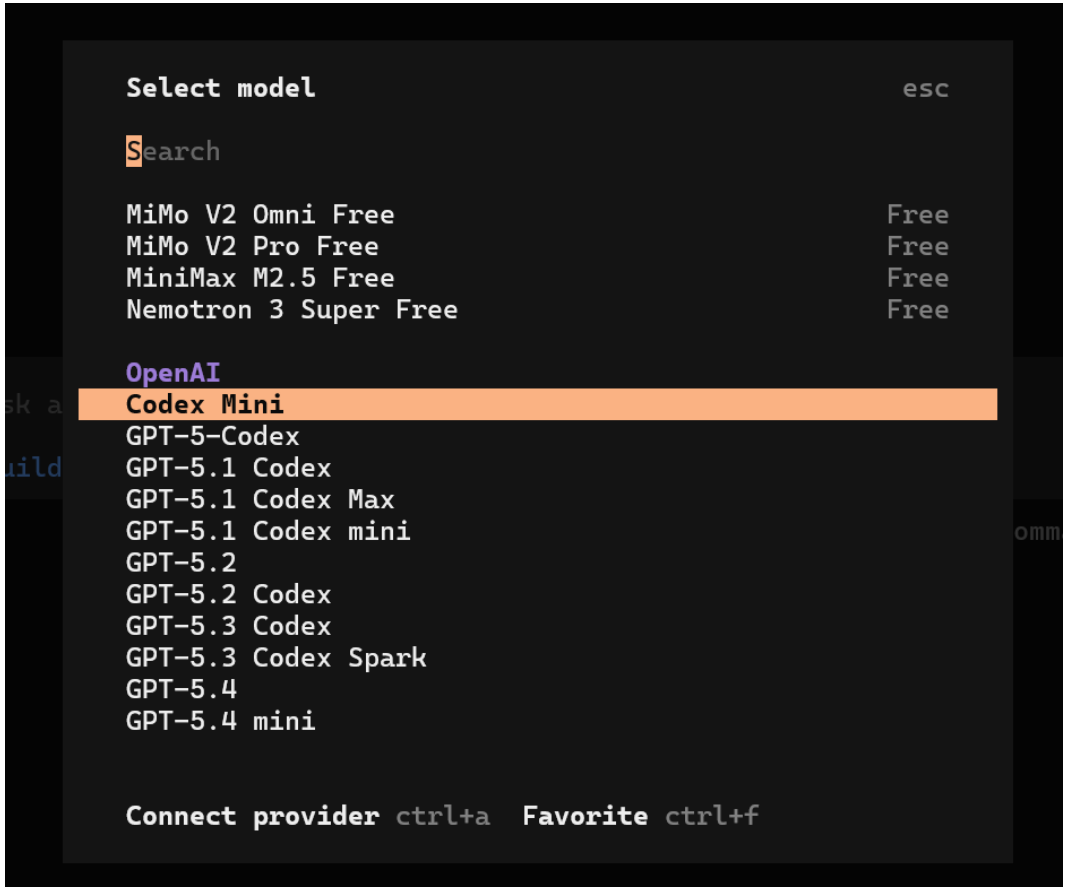
Login successful

Done

PS C:\Users\Ali>
```

Connect OpenAI with OpenCode

- Run opencode in command prompt
- Switch model (CTRL+X then m)



OpenCode Commands

Command	Purpose
/new	Create new session
/sessions	Switch session
/copy	Copy session transcript
/undo	Undo previous message
/redo	Redo
/share	Copy share link
/rename	Rename session
/agents	Switch agent
/models	Switch model
/connect	Connect provider
/exit	Exit the app
